

BSF Swissphoto is one of Europe's leading companies in delivering surveying and mapping excellence from millimeter precision to country-wide coverage. Our main business units are 3D Mapping, Engineering Surveying, Monitoring and Consulting. We are advertising an open position as an

## Airborne Sensor Operator, Flight Operations

You are responsible for the operation of our airborne sensor systems (aerial cameras, laser scanners) during survey flights and for data handling and quality control of the resulting data. In your non-flying time, you support our flight operations department in various back-office tasks.

### Your benefits:

- Work on a modern aircraft fleet with state-of-the-art sensor systems
- Multi-week missions in challenging mapping projects across Europe
- Flexible, seasonal working hours

### Your profile:

- Relevant educational degree with geo-related survey or technical/electrical background
- High technology affinity (sensors, hardware, software) and problem-solving skills
- High flexibility for out-of-office missions and irregular working hours
- You possess a high degree of self-dependence, are a team player and have a solution-oriented mindset
- Fluent in English and/or German languages, driver's license
- Bonuses: Work experience and network in the aerial survey industry; knowledge of flight operations, flight planning, survey data processing (GNSS, INS, CAD/GIS, ...)

We look forward to getting to know you! Please send your application via email to:
